School of Computing,
Union University, Belgrade

ABOUT ME

A highly motivated backend web developer with a background in crafting efficient server-side solutions. Experienced in dynamic environments and passionate about creating seamless, scalable systems that enhance user experiences. Actively seeking opportunities to apply skills and contribute to innovative projects.

PROJECTS

RouteMaster 📅 2024

- **App concept:** Platform for managing bus routes with dynamic seat configurations, real-time passenger tracking, and route optimization.
- **Role:** Sole developer and designer, handled customer interactions.
- **Languages Used:**
 - Frontend: Vue, Tailwind CSS
 - Backend: PHP (Laravel), MySQL
- **Outcome:** In operation, used by a company.

News App 📅 2023

- **App concept:** Online platform for reading and posting news, offering an enjoyable reading experience and an intuitive content management system.
- **Role:** Sole developer and designer for a school project.
- **Languages Used:**
 - Frontend: Vue, Tailwind CSS
 - Backend: Java, JAX-RS

File Generation 📅 2022

- **App concept:** App allowing users to manipulate Excel file data, generate DOCX files based on predefined settings, and create files with a specified number of pages.
- **Role:** Sole developer and designer for a client.
- **Languages Used:**
 - PHP (Laravel), MySQL, Tailwind CSS, Livewire, Python
- **Outcome:** In operation, used by a company. Still developing.

Caller ID 📅 2022

- **App concept:** Simple Python app identifying incoming calls, fetching caller information from a database, and displaying it discreetly in the system tray.
- **Role:** Sole developer and designer for a client.
- **Languages Used:**
 - Python, Tkinter, PyStray
- **Outcome:** In operation, used by a company.

Point of Sale System 📅 2020

- **App concept:** Stock management system for stores, featuring product variations, user roles, stock tracking, analysis, and offline mode.
- Hosted on pos-server.prosoftis.com.
- **Role:** Sole developer and designer.
- **Languages Used:**
 - PHP (Laravel), Livewire, Tailwind CSS, MySQL
- **Outcome:** Was in use by a company.
